**CHARACTERISTICS AND ADVANTAGES**

# AQUAFILTRO

Aqua Filtro is an inexpensive practical add-on filter device to your waterline system that filters abrasive sediments that can damage your mechanical system (e.g pumps, heater, water, softeners, portable water filters etc.)

It's system can conveniently be installed unto your waterline system in just a couple of minutes. Aquafiltro's design lets you flush out filtered sediments with just a flick of the lever.

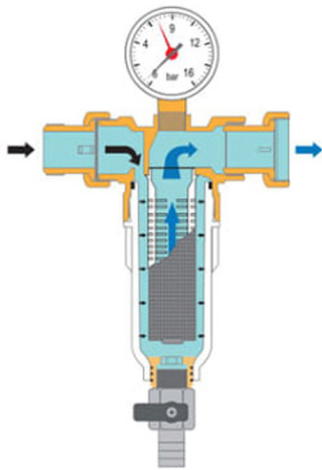

with Pressure Gauge and M/M Union Kit

with Pressure Gauge and F/F Thread

## AQUA FILTRO TECHNICAL FEATURES

### Technical Features

Maximum Temperature	65 C
Maximum Operating Pressure	16 bar / 240 psi
Ends	female UNI ISO 228 male UNI ISO 228

### Technical Features

Body  
Cup  
Cartridge Support  
Filtering Cartridge  
Cartridge Cap  
O-Rings  
Tail and nut  
Side Washers  
Manometer O-16 bar  
Emptying Valve

### Materials

CW617N-EN12165 brass
